

INNOVATION LAB

LEARN AND PRACTICE INNOVATIVE PROBLEM SOLVING!

BENEFITS & OUTCOMES

- Cultivate innovation and creativity.
- Embrace change.
- Develop more goal-oriented perspective.
- Appreciate roles and processes.

Sometimes the “tried and true” is not the best solution to a problem. It is often believed that creativity is an individual trait, but some of the best “outside-the-box” problem solving comes from team members who brainstorm and encourage each other to try unconventional approaches.

Group Dynamix is in the business of building creative teams in a nurturing yet challenging environment. Our four-hour Innovation Lab provides your team with the experiential activities and creative projects to find unique solutions to “Wicked Problems.” The lab culminates in a high energy challenge that brings together diverse people in one innovative team.

WHAT'S INVOLVED IN OUR INNOVATION LAB TEAM BUILDING EVENT?

- Fun interactive icebreakers.
- Team-based challenges.
- Processing sessions.
- Half-day and full-day programs available.

WHAT PEOPLE ARE SAYING

“Group Dynamix led and developed our highly-interactive team with interesting and challenging programs, causing us to truly work as a team to reach a favorable outcome. We were able to work toward a mutual goal with individuals we rarely work with on a daily basis, breaking down the barriers of natural separation that happens in an organization.”

– Medical City
